STEM CAREER AWARENESS FOR IDAHO MIDDLE SCHOOLS

The **number one reason** students do not pursue STEM careers is **they do not know about them**. This underscores the importance of providing students with STEM Career Awareness while reviewing Idaho Academic Standards. If you are looking to support your students' exploration in Career and Technical Education, Computer Science or English Language Arts then **Learning Blade is for you!**

WHAT IS LEARNING BLADE?

Learning Blade is an online, supplemental STEM career awareness system that:

- * Builds awareness and interest in STEM Careers
- * Demonstrates the relevance of academics to careers
- * Helps prepare students with online academic lessons
- * Aligns to state middle school standards
- * Offers offline, hands-on 3-D printing and parent engagement exercises

PROVEN RESULTS

Learning Blade is proven to increase STEM career awareness and interest:

"I do believe this program is helping to answer the infamous question "When am I ever going to use this?" because it introduces students to numerous careers, especially in STEM, that are rarely discussed or heard of. I believe that Learning Blade encourages students to visualize the possibilities and potential of their future."

Courtney Linker, Another Choice Virtual School, ID
