

IDAHO STEM ACTION CENTER

Mentorship Portal

ONLINE MENTORING PLATFORM

The Idaho STEM Action Center has created a virtual mentoring platform! Students and teachers located anywhere in Idaho can now engage with STEM industry experts. The online format facilitates meaningful interactions between mentors, students and teachers. This supports and enhances personalized, student-led research and STEM oriented projects, thereby amplifying and extending curriculum taught in the classroom.

Benefits to Your Students

The STEM mentorship platform supports teachers in creating problem-based learning experiences in their classrooms and provides practice for students in valuable 21st Century Skills such as:

- Real-world problem solving
- Critical thinking & research
- Collaborative learning and teamwork
- Creativity and imagination
- Oral and written communication
- Initiative and adaptability
- Time management and more!

INTERACTIVE PROCESS

The online mentoring platform builds a critical and productive student-mentor relationship while providing teacher oversight. Teachers have the ability to review and approve research projects and monitor written and video conferencing interactions between students and mentors.
