

The Idaho EcosySTEM is a program of the Idaho STEM Action Center that supports, connects, and empowers a network of employers, educators, policy leaders, community organizations, innovators, and volunteers to:

- Build awareness of and ensure access to STEM education opportunities and STEM careers
- Align STEM education with Idaho workforce needs of today and tomorrow
- Create successful metrics for STEM education and programming
- Build STEM momentum within the state and nationally

At the convening we will come together as a state to share successes, discuss ideas, circulate resources, and plan our state's strategic next moves to promote, grow, and enhance quality career-connected STEM education. Please join us for this dedicated time to discuss the future of STEM in Idaho.
